INTRODUCTION

This report has been written to introduce you to the concepts of astrology and how to get started with your natal chart. Astrology is a complex and meaningful science which takes years to study and apply successfully, however, we would like to whet your appetite with this report from this program, and encourage you to deepen your understanding through other means.

Astrology is a study of the connection between planets and life on Earth. It is based on a concept that energy patterns form between other planets and Earth; and that these energies affect our lives as individuals and communities.

An astrological chart, also known as a horoscope, natal chart, or birth chart, records the relationship between the planets and the signs of the Zodiac. Charts can be calculated for the birth of a person, a community, an event or anything that seems momentous. The horoscope is as individual and unique as a fingerprint.

When using these interpretations, please bear in mind that, inevitably, every chart will contain some contradictory influences, and as a result certain interpretations of different items in the same chart may seem difficult to reconcile. However, this may still be an accurate reflection your chart, as it is likely that you do experience conflicting desires, events and circumstances in your life. Usually it is the responsibility of an astrologer to synthesise these apparent contradictions in order to present a cohesive and realistic interpretation of the dilemmas of the chart.

YOUR PLANETS AND ASPECTS

The Sun

The Sun is one of the luminaries and it is said to represent your personality - how you express yourself in the world. Do you express yourself well? Do you really shine in your life or do you struggle to shine? The Sun can also give you information about your relationship with your father.

You are a sunny and optimistic individual, with a love of adventure. In fact adventure plays a key role in your life, whether it be literally travelling around the globe, or metaphorically speaking exploring the world of ideas and philosophy. You are

These are a few of the questions answered in your chart by the Moon. Information about your mother or major caregiver can also be gleaned from this luminary, as your relationship with your mother is closely linked with the satisfaction of your basic needs.
