FIRDARIA (Nodal Variation)

Planetary Period: Jupiter subperiod Mercury

From 3 Sep 2005 to 22 May 2007

Age 57.9yrs to 59.6yrs

It is time to reassess your goals and make some decisions to align yourself more closely with your life plan. If you have been longing for a new path then now is the time to make the decisions and implement changes. You may be able to make these changes quickly, or you may be forced to slowly change. This will depend on other aspects of your birth chart. However, this is a positive period and you are able to enlist the help of other people to ensure that you move forward in your life. Promotions, rewards and other forms of recognition are likely to come your way. You may decide to embark on a journey to foreign lands, or perhaps you prefer to wander the halls of academia. Either way you are keen to expand your mind. You are not likely to be as concerned with life's details, finding these things quite tedious. The more that you have felt weighed down with responsibilities during your lifetime the more that you are likely to feel the need to escape during this period. You may seek inspiration in religious or spiritual pursuits. Listen to uplifting music, start meditation classes or attend a theatrical event. Now is the time to find ways to improve your lifestyle. Follow your heart's desires without jeopardizing your success so far. This is an excellent period for growth and expansion in all areas of your life. As American actor Alan Alda once said: *"Laugh at yourself, but don't ever aim your doubt at yourself. Be bold. When you embark for strange places, don't leave any of yourself safely on shore. Have the nerve to go into unexplored territory."*

If you live through this period in your mid to late 20s then you are likely to feel happy and optimistic right now. You may have discovered love and married in the last few years. Now you are happy to focus on your work, making money and building up your resources in order to start a family. It is also possible that you marry during this period. You are a person of good standing in the community, enjoying the company of your friends, although your friendships may change over the next few years. You are still feeling youthful and ready to take on the world.

If you are in your late 50s then you are happily making choices that further enhance your life. If you married in a previous period then you are busily making plans with your spouse. You may marry during this period. If you are footloose and fancy free then you may choose to focus on your personal interests or a favourable work project. Whatever the scenario this is a happy time.

Planetary Period: Jupiter subperiod The Moon

From 22 May 2007 to 6 Feb 2009

Age 59.6yrs to 61.3yrs

Laughter abounds during this phase of your life. No matter what happens you are able to count your blessings and see the funny side. You are also feeling generous and able to give to other people right now. In particular you may enjoy working with women, or children. Your benevolent nature is likely to inspire others, and reap rewards for you, too. You are not necessarily seeking recognition, but you are likely to receive it. As the philosopher Seneca once said, *"he that does good to another, does good also to himself, not only in the consequences, but in the act; for the consciousness of well-doing is, in itself, ample reward."* This is a joyous and expansive period of your life which you can easily share with your loved ones. Make the most of the opportunities that arise, particularly those that occur in your personal and home life.

If you are living through this period in your late 50s then you may be making changes in your home life. Your family may be expanding with the addition of grand-children or other young members of the family. You are looking at the comforts in your life, hoping to increase your sense of well being. Your focus is changing from financial security and accumulation of wealth to that of comfort and lifestyle. If you work hard now then it is because you want to improve the quality of your life, to increase your choices in a few years' time.

If you are going through this period in your late 20s then you are experiencing a slightly different influence of these two planets. In the most positive way you are being asked to discard childish things and move into adulthood. It is time to really be honest with yourself about your own personal goals. What do you want to achieve in your own life? The time for pleasing your parents, or anyone else, has come to an end. Now you have the chance to really embrace your own personal dreams. Doors will open. You just have to have the courage to walk through.

Planetary Period: Jupiter subperiod Saturn

From 6 Feb 2009 to 25 Oct 2010

Age 61.3yrs to 63.0yrs

Now is the time to consolidate on the achievements past ten years of your life. If you have been saving money for a big project then now is the right time for your investment.

If you are in your early 30s then you may invest in a new house, renovate an existing home or move to a completely new land that offers new opportunities. This is time to consider all of your options and make decisions that are in the best interests of yourself and those nearest and dearest. You need to embrace new opportunities while also establishing a good foundation because otherwise you will soon feel restless, in need of change. It is also a good time to reassess your life. You are a turning point. Perhaps you need to change some of your social contacts. Friendships may have become stale, not really supporting your goals in life. As a result these friendships may end. At the very least your friends need to make adjustments. This is not a good time to lend money to friends. You may receive wise counsel from a wise elder; in particular your relationship with a grandfather figure is highlighted. This bond is changing, as are others.

If you are in your early 60s then it is also a good time to reassess your life. You are a turning point. Make the most of your assets, reassess your goals and stay tuned to your sense of purpose. It may be time to consider retirement, to start planning. You may be ready for a new phase of your life, but make sure that you have plans because the next period demands that you are active, not inactive.

Whatever your age you are well advised to make the most of your assets, reassess your goals and stay tuned to your sense of purpose. Don't let fear rule your life. Work on your self-confidence without being too grandiose. You are correct in that towards the end of this period your life is likely to change so it is up to you to make sure that you are fulfilling your destiny.
