

Solar Font

An astrological font for Windows

This font, designed for use on Windows,
makes writing astrological reports so much easier.

The Solar Font contains a complete set of symbols for planets, astrological signs and aspects plus more.

It's ideal for use in personal reports or published material. With the simple click-and-point system, so familiar to Windows users, these symbols (and many others) can be placed into any wordprocessor documents and desktop publishing software and printed.

The symbols may be interspersed in your document in any size, in **bold** or *italics*. They are simply typed in directly from the computer keyboard and viewed on-screen before printing.

Example A:-

When the ☉ is in ♈, an individual may be assertive and freedom-loving. However, ☉ ☐ ♎ may impede this individual's need for independence.

Example B:

One aspect in Dane Rudhyar's chart shows ♄ 13° ♌ 14' ♂ the Descendant at 13° ♌ 26' indicating many spiritually-focused relationships. His chart also shows ♄ in ♌ ☐ ☉ in ♈, and ☊ ☋ in ♎.
